## Vision

The FOSTAC Group, consisting of FOSTAC AG and its subsidiaries FOSTAC Technologies AG und FOSTAC International GmbH, regards itself as a pioneer in the area of new technologies. The FOSTAC Group implements the latest findings of quantum physics and energy science.

In particular, the FOSTAC Group develops products for the utilisation of free energy using crystal technologies and for the replacement of fossil fuels. In this way, it makes a substantial contribution to the elimination of nuclear and coal-fired power stations.

The FOSTAC Group regards itself as an enterprise at the forefront into a new era and considers itself bound to a higher dimension of understanding and behaviour.

With its products and services, the FOSTAC Group fosters the freedom, independence, and individual responsibility of all people.

The FOSTAC Group acts as a role model by putting the philosophy it proclaims into practice. The employees, partner firms, company management and customers form the «FOSTAC Family».

The FOSTAC Family feels an obligation to foster the wellbeing of all people. Dealing with each other fairly and lovingly forms the basis for this.

The entire FOSTAC Family is committed to help eliminate human shortcomings such as environmental pollution, misuse of atomic power, air and water pollution, abusive monetary economy, and others.

The FOSTAC Group is committed to achieving the transition of human society from its dependence on the current power structures to the fifth-dimensional level of love, freedom, mutual respect, and abstention from value judgements.
