

ELECTRIC MINI

The **ELECTRIC MINI** harmonizes electromagnetic radiation from technical, in particular wireless devices (notebook, WLAN, cordless phones etc.).

For high electromagnetic pollution or directional beam loads, we recommend the additional use of a **SANA LEA OMNI-GOLD** or **OCTARINO**. The negative effects of the internal power network can be harmonized with Electric plates (A6, A5 or A4).

Simply stick it onto the desired device. For devices with multiple units, each unit should be equipped separately.

ELECTRIC Plates are also available in size A4, A5, A6 und oversize (43 x 17 cm). The optimal size of the plate is preferably tested individually. The individual sensitivity of the user is decisive when selecting the product. Our consultants will be happy to assist you.

TECHNICAL DETAILS

Material: Glass fiber fabric, laminated

Size: A8, credit card size
