

TERRA SET

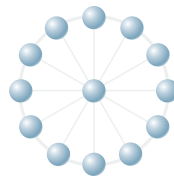

The **TERRA SET** mainly serves an ideal purpose. Thus, we can build up a harmonious energy field of 150 - 200m diameter (approx. value), which helps the earth to regenerate. The elemental beings re-enter the enlivened area. They thereby promote the prosperity and recovery of the area. The **TERRA SET** render the center of the built-up energy field a perceptible place of power.

TERRA SET spheres are imbued with properties by light elements through a special energetic process; they are not programmed using FOSTAC's conventional technologies.

Application:

Place 12 spheres in an exact circle (Ø approx. 2 m) into the ground. Depth approx. 20 cm, in agricultural areas approx. 80 cm. The 13th sphere is placed in the center of the circle.

Tip: With the help of a stick placed in the middle and a string approx. 1 m long string, the individual points can be measured out evenly.

The effect of the set builds up particularly well if the practical work is supported by an activation meditation.

TECHNICAL DETAILS

Material: Glass

Size: Ø 12 mm (13 pcs)
